Head Attacks:

These attacks have occurred from a number of sources:

Vehicle Drive-By's:

- I am currently staying in a house about 100 yards off a busy street. These people drive by up and down the street sending pain signals at one location on my head. After 20-50 hits the pain can be quite extensive. As I stated I believe these people were after me for a reason, including my ability to receive signal transfers at extended distances. Unfortunately through the course of this process they discovered I could receive signals from drive by hits.

Neighbor Houses:

- As I stated I believe these people have contacted neighbors and have one or more people located within homes around where I am currently staying sending pain signals once every so often, all during the day and night.

Vechile Tails:

- I believe my car is marked or tailed to some degree. As I drive around Huntsville, AL I am followed and hit. They are also stationed around Huntsville, in parking lots and stores. As I drive by they send the hit signal, or follow me at some distance concentrating and hitting for an extended period of time.
