Government Harrassment - Torture in Huntsville, AL using Telepathy - Mind Control Techniques

The primary purpose for these head attacks was undoubtedly money. Different folks were able to gain monetarily for different reasons. As I have indicated previously, these attacks are occurring 24 hours a day. Someone or agency must be footing the bill to have these people follow and torment me in this fashion.

These attacks were also intended to degrade and demoralize me into some type of submission. Throughout this process of theirs, I was "played" for different reasons. As I will discuss in the previous page at some point, one of the primary uses of this technology, if you will, is to gain control over the targets mind. These attacks were intended to degrade my brain capability and thus through various types of suggestion gain control over my person.

In addition these attacks were intended to strip me of whatever capability they may have originally seen. As I stated in the first page of this site, their original intention was to get me in with them. At some point the strategy shifted, and they used these attacks to "TAKE ME DOWN." They did not want to leave someone walk the streets who could spot them and potentially hear, so to speak, their communications ... that is pick up their telepathic communications. These attacks degraded and eliminated this capability I obviously possessed, why else would they have spent so much time and resources with these head attacks.

At a later date I will discuss several of the "plays" they made on me. The validity and reasons for these plays are/will be speculation, although the primary purpose was/is to screw with my mind.

These people's prime purpose is to paint picture and make people/targets believe what they want them to believe. They use this capability to beat you down, tear you down, so at some point you will give in and believe what they are telling you and making you believe. They instill these beliefs and thoughts into your head through telepathic suggestion.

I think you call it being brain washed. It's just a high tech, high level version of it. They just have extensive amounts of resources and man power to make it happen.

PICTURES OF HAIR LOSS CHARTS HERE,,,

Above are photos showing bald spots I have discovered. These spots are located exactly where I am encountering significant pain all during the day and night. Some research has uncovered use of microwave radiation as an additional means of mind control. The following article, <http://www.whale.to/b/rifat4.html>, discusses this technology.

MIND CONTROL IN THE UK

by Tim Rifat BSc BEd.

"Precisely modulated microwave radiation is used to influence brain function. Human behaviour and reactions can be entirely controlled by using pulse modulated microwave EM radiation. Pulse modulated microwaves are useful as the carrier for the mind control signals as they are able to pass through the skull..."

I am not completely convinced it is purely telepathic signal transfer they are using against me. Use of this microwave radiation technology coupled with telepathic signal transfer could be causing these deformities on my skull.

These deformations change in severity depending on where and how

long attacks are concentrated.
